Experience

J PMorgan — Senior Design Associate (AVP) | Present

- Designed SaaS-style enterprise onboarding systems for companies joining J PMorgan Workplace Solutions.
- Built end-to-end task lifecycle frameworks including ownership, dependencies, visibility, workflow states, and operational logic.
- Designed profile, documentation, and account journeys aligned with compliance-heavy operational requirements and enterprise workflows.
- Collaborated closely with product, engineering, business, and leadership stakeholders across multiple teams.
- Won the J PMorgan Hackathon by redesigning advisor prospecting workflows and improving engagement visibility.

Cuemath — Senior Product Designer | Feb 2023 – Aug 2024

- Built a 0-to-1 digital admissions platform replacing RM-led admissions with a product-led onboarding journey.
- Improved referral and retention flows, reducing friction and strengthening product-led growth loops.
- Worked cross-functionally with engineering, product, and business teams to streamline enrollment experiences.

Razorpay — Senior Product Designer | Sep 2022 – Feb 2023 (Contract)

- Bulk Payouts on Mobile: Made it easy for businesses to make many payments at once from their phones.
- Vendor Payments: Built a mobile feature for small business owners to pay suppliers on the go, creating a differentiated mobile-first experience and doubling payment usage.
- Money Movements: Reworked the app to surface urgent actions in one place so busy business owners could save time and use the product more often.
- Bulk Payouts: Improved the approval flow so businesses could review and approve multiple payments at once.

Udaan — Product Designer II | June 2021 – Aug 2022

- Led product design initiatives for the food category including homepage strategy, vendor research, and workflow improvements.
- Scaled the design system across teams with accessibility improvements and measurable component adoption frameworks.
- Designed GTM touchpoints across app surfaces, WhatsApp campaigns, and ecommerce journeys.

smallcase gateway — Founding Product Designer | May 2019 – Dec 2020

- Created design system for the product smallcase Gateway.
- Created product touchpoints as first entry points at strategic places, merchant landing pages, and single/multi-stock gateway flows for merchant sites.

smallcase — Founding Visual Designer | Dec 2018 – May 2019

- Created visual guides and illustration guides for the org.
- Created email templates and component guides; led a 2-person visual team across illustrations, iconography, voice, and tone.
