

Abhishek Raj

Senior Product Designer | Enterprise UX | SaaS | Fintech | AI-driven Product Experiences

Portfolio: r2designs.github.io | Resume: [resume.pdf](#) | Email: abhishekraj4300@gmail.com | Phone: +91 8092233430

Professional Summary

Senior Product Designer with 7+ years of experience across fintech, enterprise SaaS, ecommerce, SME finance, and edtech products. Specialized in designing scalable enterprise systems, onboarding workflows, documentation journeys, task lifecycle frameworks, and platform experiences for complex multi-stakeholder environments. Strong expertise in workflow design, information architecture, design systems, UX strategy, interaction design, AI-assisted prototyping, AI-powered workflows, user research, and cross-functional collaboration. Experienced in building 0-to-1 products, simplifying complex systems, and driving intuitive, product-led user experiences.

Enterprise UX • SaaS Platforms • Workflow Design • Design Systems • User Experience Design • Interaction Design • Information Architecture • Product Strategy • User Research • UX Writing • Wireframing • Prototyping • Cross-functional Collaboration • Stakeholder Management • Leadership • Mentorship • Fintech UX • B2B SaaS • Mobile App Design • Responsive Design • Product-led Growth • AI Prototyping • AI-powered Workflows • Generative AI

Tools

Figma • FigJam • Framer • Jira • Confluence • Notion • Miro • AI-assisted Prototyping • Design Systems • Documentation Systems

Experience

J.P. Morgan — Senior Design Associate (AVP) | Present

- Designed SaaS-style enterprise onboarding systems for companies joining J.P. Morgan Workplace Solutions.
- Built end-to-end task lifecycle frameworks including ownership, dependencies, visibility, workflow states, and operational logic.
- Designed profile, documentation, and account journeys aligned with compliance-heavy operational requirements and enterprise workflows.
- Collaborated closely with product, engineering, business, and leadership stakeholders across multiple teams.
- Won the JPMC Hackathon by redesigning advisor prospecting workflows and improving engagement visibility.

Cuemath — Senior Product Designer | Feb 2023 – Nov 2024

- Built a 0-to-1 digital admissions platform replacing RM-led admissions with a product-led onboarding journey.
- Improved referral and retention flows, reducing friction and strengthening product-led growth loops.
- Worked cross-functionally with engineering, product, and business teams to streamline enrollment experiences.

Udaan — Product Designer II | Mar 2021 – Sep 2022

- Led product design initiatives for the food category including homepage strategy, vendor research, and workflow improvements.
- Scaled the design system across teams with accessibility improvements and measurable component adoption frameworks.
- Designed GTM touchpoints across app surfaces, WhatsApp campaigns, and ecommerce journeys.

smallcase — Product Designer | Dec 2018 – Dec 2020

- Designed embedded investing experiences including merchant entry points and multi-stock transaction flows.
- Created scalable landing pages and product communication systems improving merchant onboarding clarity.
- Built illustration, iconography, and component systems supporting consistent design-system adoption.
