

Abhishek Raj

Senior Product Designer | Enterprise UX | SaaS | Fintech | AI-driven Product Experiences

Portfolio: r2designs.github.io | Email: abhishekrj4300@gmail.com | Phone: +91 8092233430

Professional Summary

Senior Product Designer with 7+ years of experience across fintech, enterprise SaaS, ecommerce, SME finance, and edtech products. Strong expertise in workflow design, information architecture, design systems, UX strategy, interaction design, AI-assisted prototyping, AI-powered workflows, user research, and cross-functional collaboration. Experienced in building 0-to-1 products, simplifying complex systems, and driving intuitive, product-led user experiences.

My AI Workflow

I build faster by bringing AI into my workflow right from the inception stage. Tools like ChatGPT and Gemini help me with ideation, market research, and exploring different solution directions.

I also use AI to go through large amounts of reports, user interviews, and research inputs, which helps me identify patterns faster and make usability testing more focused.

For execution, I use Figma MCP and Copilot to create faster prototypes and improve the design-to-development process. This helps the product, design, and development triad work more closely and move faster towards solving a problem statement.

Core Skills & Keywords

Enterprise UX • SaaS Platforms • Workflow Design • Design Systems • User Experience Design • Interaction Design • Information Architecture • Product Strategy • User Research • UX Writing • Wireframing • Prototyping • Cross-functional Collaboration • Stakeholder Management • Leadership • Mentorship • Team Building • Design Culture • Sprint Planning • Roadmapping • Fintech UX • B2B SaaS • Mobile App Design • Responsive Design • Product-led Growth • AI Prototyping • AI-powered Workflows • Generative AI

Tools

Figma • FigJam • Framer • Jira • Confluence • Notion • Miro • AI-assisted Prototyping • Design Systems • Documentation Systems

Experience

J PMorgan - Senior Design Associate (AVP) | Present

- Designed SaaS-style enterprise onboarding systems for companies like Saudi Aramco, Sony and others.
- Built end-to-end task lifecycle frameworks including ownership, dependencies, visibility, workflow states, and operational logic.
- Designed profile, documentation, and account journeys aligned with compliance-heavy operational requirements and enterprise workflows.
- Collaborated closely with product, engineering, business, and leadership stakeholders across multiple teams.

- Introduced and scaled the AI-led workflow across the design team, helping standardize design system usage through MCP and improving overall speed, consistency, and efficiency.
- Won the J PMorgan Hackathon by redesigning advisor prospecting workflows and improving engagement visibility.

Razorpay - Senior Product Designer | Sep 2022 - Feb 2023 (Contract)

- Bulk Payouts on Mobile: Made it easy for businesses to make many payments at once from their phones.
- Vendor Payments: Built a mobile feature for small business owners to pay suppliers on the go, creating a differentiated mobile-first experience and doubling payment usage.
- Money Movements: Reworked the app to surface urgent actions in one place so busy business owners could save time and use the product more often.
- Bulk Payouts: Improved the approval flow so businesses could review and approve multiple payments at once.

smallcase Gateway - Founding Product Designer | May 2019 - Feb 2021

- Designed smallcase Gateway from 0-to-1, enabling brokers and fintech platforms to integrate stock and smallcase investing experiences.
- Owned merchant onboarding, investment flows, single-stock journeys, success states, and integration touchpoints across partner platforms.
- Established early design systems, interaction patterns, and product foundations that helped scale Gateway across ecosystem partners.

smallcase - Founding Visual Designer | Dec 2018 - May 2019

- Created the visual design foundation for smallcase including illustration systems, iconography, communication templates, and brand guidelines.
- Led a small visual design team and helped define product voice, tone, and design consistency across customer touchpoints.

Cuemath - Senior Product Designer | Feb 2023 - Aug 2024

- Led product design across admissions, growth, retention, and learning journeys, helping Cuemath move key experiences from fragmented flows to more cohesive digital products.
- Built Cuemath's digital admissions experience from the ground up, reducing dependence on manual RM-led processes and creating a smoother path for parents to discover and enroll.
- Led a team of 3 designers, translating business requirements into clear roadmaps, sprint plans, and scoped workstreams so the team could move with better focus and predictability.
- Helped create a stronger design culture by bringing more structure to critiques, collaboration, and day-to-day decision making, while mentoring teammates and raising the overall quality bar.
- Improved referral, homepage, and retention journeys through thoughtful iteration, making the experience feel more intuitive and more aligned with user needs.

Udaan - Product Designer II | Jun 2021 - Aug 2022

- Designed for high-scale B2B commerce workflows across onboarding, growth, and operational journeys, simplifying complex experiences for retailers and internal teams.
- Worked closely with product, engineering, and business stakeholders to break down broad business goals into practical design priorities and execution plans.
- Led a team of 3 designers, translating business requirements into roadmaps and sprint plans while helping build a stronger design culture through better collaboration, sharper feedback loops, and more thoughtful systems thinking.

- Shaped marketplace and engagement experiences that balanced user needs with business goals in a fast-moving, highly cross-functional environment.

Education

VIT Vellore - Information Technology major with Human Computer Interaction minor

Certifications

Product Development Accessibility (Feb 2025)

Introduction to Digital Accessibility (Mar 2025)

2024 IPB Cross Border Fundamentals (Mar 2025)
